

Application Access

How to access the application?? – answered below

As the application is deployed live on the internet, the first step is to visit the following link:

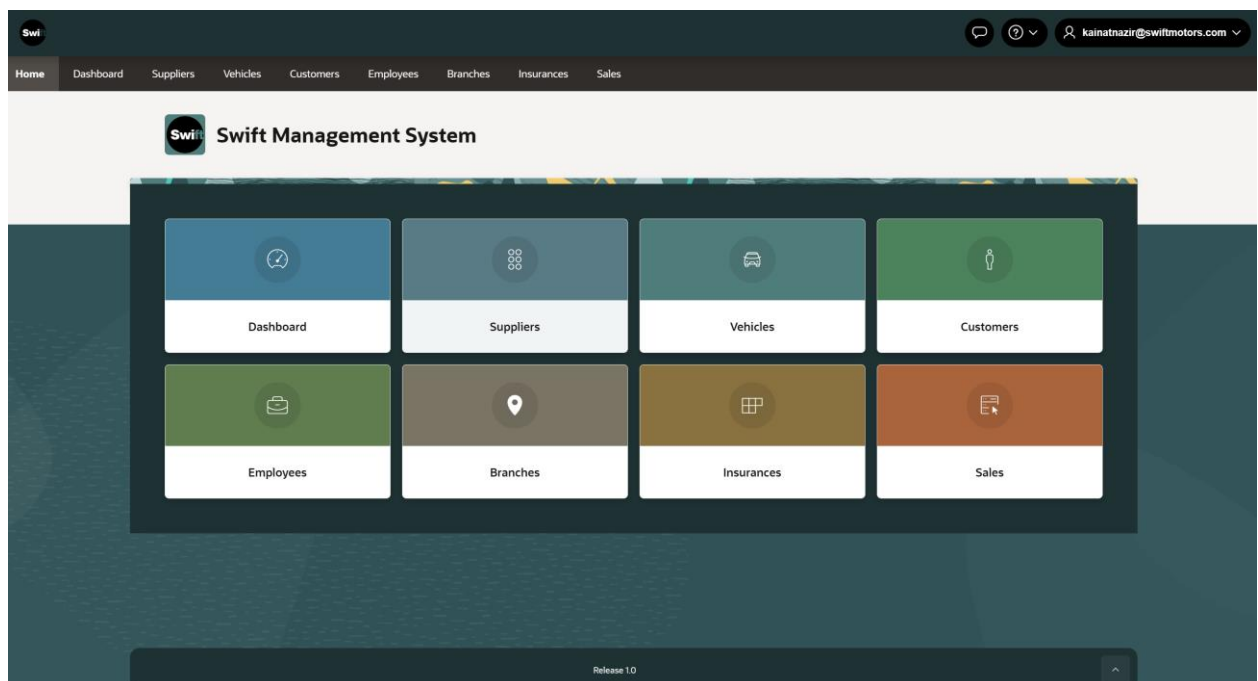

https://apex.oracle.com/pls/apex/r/automotive_dealership/swift-management-system/login?session=108595651218341

[Swift Management System - Log In \(oracle.com\)](#)

For ma'am a respective account is already created.

The username is kainatnazir@swiftmotors.com and the password is 'swift@2024'. Ma'ams account has a different interface with no access to database administration; however, she can perform every other task in terms of deleting, adding or renaming existing entries of data. An entire record for each user is also recorded on the backend.

Above is the page after first logging in which further has different section, which can be interacted with.
